

2 Pin LED Strip Connector T Joiner

Connection:

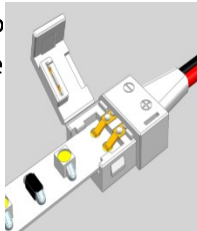

1. Cut the desired length of the LED strips ensuring that the current rating doesn't exceed 4A(12V), 2A(24V).

2. Open the 2 pin clip on connector all three sides.

3. Insert the LED strips into the connectors and ensure that the contacts slide directly in line with the 2 pins. The correct polarity positive and negative will also need to match with each LED strip.

4. Close the connectors securely in place. Now all three LED strips will be joined together.

Specifications:

Voltage: 12/24VDC

Current: 4A (12V)

2A (24V)

LED Type: 5050/5060

LED Colour: Single 2 Pin

LED Strip Width: 10mm

Dimensions: 50(L)x14(W)x4(D)mm
